RE: Leak Repair Data Request

Dear Mr. Robertson:

PG&E is providing the following data for all Grade 1 leaks found on PG&E's transmission and distribution pipeline facilities for the period 1/1/2010 to 5/1/2013:

1. Leak ID number
2. Dates the leaks were found and repaired or downgraded
3. Current status of all leaks found

PG&E queried its IGIS (Integrated Gas Information System) database on May 17, 2013, for a listing of all Grade 1 leaks found between 1/1/2010 through 5/1/2013. This list includes all leaks that were at any time in their life cycle categorized as a Grade 1, including the grades and dates for all re-checks. The list also includes the current status of each leak indication and, if applicable, the due date for repair. A definitions table is included in the Excel attachment on the first tab that describes the meaning of each column. Please see attachment "*Gr1 Leak Status_1-1-2013 to 5-17-2013.xls*." PG&E found a total of 25,756 leak indications during this time period that were at some point during their life cycle categorized as a Grade 1 leak (including Dig-ins). Of those Grade 1 leaks, 1,012 have been cleared, 24,625 have been repaired, and 127 have been downgraded and are currently active.

Please also see attachment "*Index for Index No. 3933 - Leak Survey and Repair.xlsx*" for a list of all the prior data request responses previously sent to the Media and CPUC. Please note that some attachments are being provided pursuant to Public Utilities Code §583.

If you have any questions about the documents provided, do not hesitate to call me.

Sincerely,

Frances Yee
Interim Director, Regulatory Compliance & Support
Gas Operations
Pacific Gas & Electric Company
